

Looking for Reliable POS Data Entry Peripherals to Increase Your Profits?

Look No Further! Preh POS Keyboards and Touch Screens Are Your Solution!

*Increase Profitability on Maintenance Contracts
Improve Client Loyalty and Service Levels
Make Recommendations with Confidence*

Tom Niedzwiecki (VP of Marketing) of NETS Electronics Inc., a Bedford, New Hampshire based POS service and maintenance provider, has been depending on Preh POS keyboards to help exceed customer expectations for 15 years. With more than 25 years in the POS service industry, NETS has built the reputation of a highly professional, efficient, and reliable business partner.

During that 15 year relationship, NETS has supplied and installed huge quantities of Preh keyboards to major grocery store chains such as Shaw's, in addition to many independent retailers. NETS and their clients, the retail end user's, have found Preh POS keyboards to function very well, even after many years of heavy use. NETS clients also find the Preh row & column keyboards easy to program and reprogram as their needs at the POS evolve.

"Preh Keyboards are the most reliable on the market; extremely flexible, configurable, and programmable," states Tom Niedzwiecki.

With preventive and remedial maintenance contracts that VAR's typically offer to clients, dependable POS equipment is imperative. Preh Keyboards are so reliable, service calls are eliminated, ROI is increased, and VAR personnel are focused on other revenue-generating activities. Because Preh keyboards are virtually service free, customer complaints are minimized, and customer relations are enhanced. Implementation and training costs are minimized, and the unprecedented customization offered by Preh allows for a seamless transition.
