Aloha Data Systems and PrehKeyTec Team Up to Offer Customized Solution

Buffalo Grove, IL – PrehKeyTec and Aloha Data Systems have partnered together to deliver a custom key layout for the PrehKeyTec MCI60BMU (part number 90328-117/1800) to support Aloha's *StoreTender™* software. Taking advantage of PrehKeyTec's ability to embed keystrokes and create hot keys, PrehKeyTec and Aloha worked together to integrate the most common *StoreTender™* functions into single key strokes. The solution simplifies transactions, reduces cashier training time and offers a more intuitive, easy-to-use POS system through color-coded keys. The product was recently introduced for distribution through BlueStar (www.bluestarinc.com).

About Aloha Data Systems, Inc.
