

**To the customers and Business-Partner's of Preh Electronics, Inc**

**Subject: Conforming to RoHS Directive**

Dear Sir or Madam:

Since the publication of the EU-Directive, the Preh Group and our suppliers have been working to conform to the RoHS requirements as quickly and efficiently as possible.

Our internal production processes conform to the RoHS requirements. However, we have not as yet received confirmation of full compliance for all of our out-sourced products and materials. We expect that some of these suppliers will not announce RoHS compliance until shortly before January 7, 2006. Our electronic module providers are dependent upon their components suppliers to comply with RoHS.

All of our suppliers expect to have achieved compliance by January 7, 2006. We will continue to collaborate with them to obtain their compliance statements before this date.

**Presently, we hereby inform RoHS conformity for DIN Connectors, Mini Din Connectors and subassemblies.**

We will provide you an update of our RoHS compliance progress in November 2005.

Best Regards,
