## MCI Touch

**A**re your touch screens providing the ROI they should ?

- Rugged Reliability**
- Lowest cost of ownership in the industry
  - Rugged design stands up to environment and operator abuse
  - 3 year warranty provides peace of mind
  - Rubber wedge sealing
  - Scratch resistant screen
  - Baffled speakers

**Confident Usability**

Is touch screen cable management a constant problem?

- Built-in power supply
- Integrated MSR
- Integrated speakers
- 3 desktop mounting options
- 1 cable for everything
- Screen sealed against spills
- 3 year warranty

The MCI Touch Series offers numerous options such as a built-in 3 track magstripe reader and Dual Axis (tilt and swivel) 2x20 VF customer display. The touchscreen, magstripe reader, and customer display all interface to the PC through a single cable, thus eliminating unnecessary cables. The MCI 15BMU and BDMU also offer two additional USB ports for further expansion. The touch displays also come with an internal power supply, a rubber wedge seal to protect against spills, a top-down anchor mounting system and a Kensington lock connection for greater security. These displays offer ergonomic features for optimal interaction comfort, including a broad range of vertical tilt, an exceptionally stable base to eliminate "wobbling" when touched, lockable display controls hidden from the view of casual users, and an Auto-Sensing Brightness Adjustment feature not found in any other desktop touch solution on the market today.
